

SAK208

8" Two Way Full Range Speaker

DESCRIPTION

SAK208 is a 2-way full-range speaker with high sensitivity, high sound pressure and excellent directivity control. It is used in small and medium-sized sound reinforcement places that require high sound pressure and high reliability. Can be used alone or with SAK series low frequency loudspeakers. Computer simulation design obtains good frequency response and phase characteristics. It is suitable for full-range sound reinforcement, language sound reinforcement, conference systems, background music, bars and dance halls and other public places. It can also be used for monitoring, monitoring or fill in large sound engineering or touring systems. SAK208 is composed of an 8-inch low frequency unit and a 1-inch PEI polymer diaphragm high-frequency compression driver, which is made of laminate and surface paint process. The SAK208 adopts a multifunctional structural design, suitable for touring performances and fixed installations. Professionally designed installation accessories and 7×M8 hoisting points can adapt to different environments for convenient and quick installation and hanging
