

SAK15M

15" Two Way Full Range Monitor Speaker

DESCRIPTION

SAK15M is a compact 2-way full-range professional monitor speaker. Used in various performance venues that require high reliability, SAK15M adopts a 3-inch NdFeB high-frequency compression driver, and the diaphragm is made of polymer material to provide natural sound and high-power output. The 15-inch NdFeB internal magnetic low-frequency driver optimizes the magnetic circuit and short-circuit loop through finite element analysis to achieve lower distortion and greater clarity at high sound pressure. The frequency divider adopts a two-order attenuation slope frequency dividing circuit to make the frequency response balanced and smooth, and the perfect protection circuit is safe and reliable. The SAK15M monitor speaker system is suitable for a variety of applications, whether it is small or large stage, language to full-range applications.
