

MS15Ba

15" Line Array Low Frequency Active Loudspeaker

DESCRIPTION

MS15Ba loudspeaker is a low frequency loudspeaker in the MS series loudspeaker which adopts a brand-new external structure and surface painting process. 15-inch low-frequency active speaker, computer simulation design, thick and full low-frequency effect, used with the mid-high frequency speaker MS55. The surface of the speaker adopts the powder spraying process, so that the surface mesh not only has high strength, but also has good resistance to salt spray. Years do not rust. The inside of the iron mesh is made of cotton, which can prevent the direct entry of external rainwater, and can play a role in preventing rainwater. MS15Ba speakers and MS55 full-range speakers are mainly used in large conference rooms, multi-function halls, churches, auditoriums, small and medium-sized mobile performances and other places. Especially for the performance of human voice: "clear, full, and without losing weight", this is the sound quality characteristics of MS15Ba and MS55.
